

Claims

- [c1] 1.A computer mouse cover for a computer mouse, comprising:
an anterior width of material; and
a posterior width of material, in communication with said anterior width of material;
wherein said anterior width of material is larger than said posterior width of material.
- [c2] 2.The computer mouse cover of claim 1, wherein said anterior width of material is flexible.
- [c3] 3.The computer mouse cover of claim 1, wherein said posterior width of material is flexible.
- [c4] 4.The computer mouse cover of claim 1, wherein said anterior width of material is measured between anterior ends of side walls of the computer mouse.
- [c5] 5.The computer mouse cover of claim 1, wherein said posterior width of material is measured between posterior ends of side walls of the computer mouse.
- [c6] 6.The computer mouse cover of claim 4, wherein said posterior width of material is measured between poste-

rior ends of side walls of the computer mouse.

- [c7] 7.The computer mouse cover of claim 1, further comprising curved tips protruding perpendicular to and in communication with said posterior width.
- [c8] 8.The computer mouse cover of claim 7, wherein said curved tips are formed to engage the front of the computer mouse.
- [c9] 9.The computer mouse cover of claim 1, wherein said anterior width of material is formed to engage the anterior ends of side walls of the computer mouse.
- [c10] 10.The computer mouse cover of claim 1, wherein said posterior width of material is formed to engage the posterior ends of side walls of the computer mouse.
